## INSTALLATION DIFFICULTY

## INSTALLATION INSTRUCTIONS

- 01.** Drain coolant, then remove the stock radiator, expansion tank, and fan shroud.
- 02.** Install the two foam strips provided with the Mishimoto radiator along the two side edges of the fan shroud, as shown below, before re-installing the fan shroud and Mishimoto radiator. These foam strips seal the gaps between Mishimoto radiator and fan shroud side edges, forcing more airflow through the radiator core.

**03.** Install Mishimoto radiator the same way you would install a stock radiator, using original hardware.

**04.** Refill coolant and bleed the system.

**Congratulations! You have finished installing the Mishimoto 2007–2014 Toyota FJ Cruiser/2003–2009 4Runner Performance Aluminum Radiator.**
